Naviance for Juniors

Naviance is a website that is being used by all Lakewood High School students to help them put together their career and academic plan (ICAP) while exploring future careers and interests. It becomes an even more important tool for juniors as they begin their college search and application process. Some of its features:

- Search for and compare colleges and scholarships.
- Track when their college applications have gone out.
- Receive emails about scheduled college visits and other pertinent information.
- Take a personality inventory that can match students with career fields and lead them to colleges that can prepare them for these fields.

Juniors are strongly encouraged to use this website more often to explore all of the opportunities and information available. As counselors begin to work with students, preliminary research and documentation students have done will contribute greatly to our conversations.

1. Click on the following link to access Naviance [here](#). Click on “Log in with Active Directory”, and then enter in your username and password the same as you would your Infinite Campus username and password.
2. You are now on the “Clever” log in screen. Clever is an app that combines all of your logins that you use within Jeffco to be the same (pretty handy!). Click on the Naviance icon on the left hand side. If you have trouble logging in, please see your Counselor.
3. Update your profile, by clicking on “About Me”, then “My Account””. While email is “outdated” to our students, the older generations still tend to favor this form of communication, and an updated email address and cell phone number will allow people to give you pertinent information consistently; thank you in advance!
4. You should then be able to access your “About Me” tab. In this section, we ask that you fill out the “Junior Conference Survey”, located under “My Surveys”, then “Surveys Not Started”. This allows us to get some information about you before we sit down to talk. The Resume, College Search, Scholarships and Money link, and Game Plan Survey are all tasks that can help you discover a sense of “fit” you are looking for that will be helpful for you to continue to explore. We encourage you to work through all of these
components- the more you use Naviance, the more you will be confident in colleges that “fit” you!
